

Putting Home Textiles to the Test

UL home textile testing helps you meet the requirements of your most demanding clients.

UL's global base of industry knowledge and technical capabilities delivers the information, guidance, and resources to help increase speed to market, drive product quality, and enhance customer satisfaction.

Our experienced textile experts perform testing and assessments to international standards for many textile products including:

- Bedding and accessories
- Developmental fabrics and fibers
- Mattresses and pads
- Curtains and draperies
- Yarn
- Rugs and carpets

Our global network of laboratories provide physical testing and chemical analysis from raw fibers through finished products:

- Physical and mechanical properties
- Flammability
- Construction
- Strength and performance
- Colourfastness
- Care labelling and care instructions
- Feather and down testing
- Dimensional changes and appearance
- Anti-fungal and microbiological analysis
- CPSIA testing
- REACH and RSL

Since 1894, UL has been a respected leader in safety science. Today, UL is advancing its commitment to protecting people, products and places through expert advisory and independent quality assurance testing, inspections, and assessments for a wide range of consumer products. Our network of more than 131 laboratory testing and certification facilities in 39 countries helps drive the integrity of global supply chains, optimise product performance and protect brands.

For more details on how UL can help ensure the safety and quality of your textiles contact QAInfo@ul.com or visit ul.com/consumer-products.
