

Protecting the Reputation of Your Goods, and Your Good Name

UL helps mitigate supply chain risk for textile and apparel products.

With comprehensive knowledge of the standards impacting textile and apparel performance, construction, and composition, UL's experts provide a vital check on product quality at every stage of production. From factory to shelf, we help ensure products meet quality, safety, and social standards.

UL partners with clients throughout the production cycle to assess risk and develop solutions that effectively evaluate the quality and safety of textiles and garments, including:

- Apparel
- Accessories, gloves & hats
- Fabric and fibres
- Home textiles
- Handbags and luggage
- Leather
- Upholstery
- Yarn

Our test programmes address all the components of the textile supply chain to assure products are safe, and manufactured to brand standards. An early review by our experts can reduce time to market and help avoid costly recalls.

- Fibre identification/content
- RSL
- Care instruction and labelling
- Flammability
- Colourfastness
- REACH
- Mechanical testing
- Children's apparel risk assessments
- Moisture management
- Feather and down testing

Our inspection and factory audit solutions use industry and government standards to help you understand your factory's quality systems, production capabilities, as well as monitor social compliance.

Since 1894, UL has been a respected leader in safety science. Today, UL is advancing its commitment to protecting people, products and places through expert advisory and independent quality assurance testing, inspections, and assessments for a wide range of consumer products. Our network of more than 131 laboratory testing and certification facilities in 39 countries helps drive the integrity of global supply chains, optimise product performance and protect brands.

For more details on how UL can help ensure the safety and quality of your textiles and apparel contact Apparel@ul.com or visit ul.com/apparel.
